BLOOD DONORS
Donor Self-Deferral Information

Travel sheet listing COVID-19 affected countries
If you have traveled to or resided in any of the areas on the list provided to you, we ask you to return to make a blood donation more than 28 days after your departure from the identified area(s).

If you are feeling ill or have an illness with a fever, you may not donate blood today. But please do return as soon as you have returned to your normal healthy self.

If either of the following apply to you, you may not donate today:
If you have been diagnosed with or suspected of having Coronavirus (COVID-19)? Please return to donate after you return to wellness and at least 28 days after resolution of symptoms.

If you have cared for, lived with, or otherwise had close contact with individuals diagnosed with, or suspected of having Coronavirus (COVID-19)? Please return to donate blood after at least 28 days has passed since the last possible close contact to a person with Coronavirus (COVID-19).

Thank you so much for coming in today. Please let us know how/if we can assist you further during your visit today.
